

DIMMER PANELS –CUSTOM

A full line of empty dimmer panel solutions

Dimmer Panels are used for lighting controls. We design, fabricate, and powder coat a large variety of enclosures that have dimmer cut outs on the cover or, on the inner panels. They can be manufactured from aluminum, stainless steel, or powder coated steel in a large variety of colours.

Custom sizes and multiple device locations and combinations are available.

Options include:

- solid or lexan door
- inner panel
- knockouts
- lockable.
